Task #1 - Points: 1

Text: Reflect on the following topics

#1) What concepts/topics were totally new to you?

Explanation (required) ✓

Mention specific concepts/topics

[PREVIEW RESPONSE]

The multi-dimensional arrays were completely new to me. I was not comfortable with arrays before but lesson 10.1-10.10 definitely helped, I understand how they work now. The loops and functions lessons were also very helpful.

#2) What concepts/topics were you already familiar with?

Explanation (required) ✓

Mention specific concepts/topics

[PREVIEW RESPONSE]

I was familiar with all the lesson taught, but it did help explain some concepts better. I was introduced to loops, arrays, and functions in a earlier class that was based on Java.

#3) What topics do you still not feel confident about? If confident, explain why.

Explanation (required) ✓

At least a few reasonable sentences.

[PREVIEW RESPONSE]

I did not feel confident about the multi-dimensional arrays, I haven't really touched on that topic but I'm new to it. I can see how it works but it just seems really complex and long. I think practicing with it should help.
